

## Unico Programming Assignment

The Enterprise Java application is committed at

Git Location : <https://github.com/danysamuel/jax-rs-jpa-soap.git>

The application is developed using Spring boot with Spring Web, Spring Security, Spring Web Service, JMS Activemq and JPA.

The RESTful web services are written package **com.danyprj.rest.gcd**. SOAP web services are at location **com.danyprj.models.soap.gcd**

The SOAP config and Spring security configs are at **com.danyprj** and **com.danyprj.config**

Derby is used as embedded DB.

The application is authenticated using Spring basic authentication. The user is taken to the homepage where the Rest and SOAP webservices links are provided. The application is packaged as .war file and it will run in JBoss and GlassFish Application Servers.

All the mentioned functionalities are being incorporated.
